

SoccerTurf Ranges

Research

Xtreme was developed with TenCate in conjunction with famous soccer clubs, such as AFC Ajax and TNO Industrial Technology, the key development focus of the fibre was:

- durability
- grip
- sliding friendliness

Ball behaviour and especially the ball roll are key in player satisfaction, that's why the research effort focused on resilient but soft fibres, **Xtreme** offers these unique aspects in just one fibre through a well thought shape and the patented **Xtreme** formulation.

Xtreme yarn is used in the SoccerTurf **XD** system and the system results in:

- increased stability
- good shock absorption
- perfect playing surface
